RE: Hoshizaki America, Inc. announces the production of the Air Cooled
KM-600MAH, Energy Star Certified A Modular Crescent Cuber Ice Machine

- The KM-600 Crescent Cube Ice machine is a **115 volt** unit that produces up to 592 lbs. of ice within 24 hours
- The air cooled model is **Energy Star** Certified measuring 22"w x 27 3/8" d x 37 7/16" h
- Mount two units side-by-side in only 44" of floor space, for 1,184 lbs. per 24 hours
- The KM-600MAH complies with **California Energy Commission** guidelines (CEC), and qualifies for **rebates** in various US states
- To improve sanitation, the KM-600MAH is protected by **HoshiGuard** Antimicrobial Agent which prohibits bacteria, mold and other microorganisms within the ice making zone
- Hoshizaki's signature stainless steel evaporator produces **individual** crystal clear crescent cubes
- The vertical position of the evaporator allows individual ice cubes to form on both sides, doubling ice production
- The **CycleSaver**® Design allows the unit to produce the same quantity of ice in about half as many cycles as competitor units
- Assisting the Service Technician, the **Evercheck Control Board**™ sounds an audible warning when service is needed
- The durable, attractive stainless steel finish and fewer moving parts prolong the life of the machine and dependability

Hoshizaki America, Inc. is headquartered in Peachtree City, Georgia with manufacturing operations in both Peachtree City, Georgia and Griffin, Georgia. Hoshizaki's automated facilities manufacture complete lines of ice makers, dispensers, refrigerators/freezers and related accessories.
